This dataset of 441 players in the National Basketball Association is organized into 29 teams. For each player, area indicates number of points scored and color indicates number of personal fouls. Darker, redder colors indicate more personal fouls. There is clearly a wide range of scoring and personal fouling, but the large green rectangles highlight those who manage to score many points while avoiding personal fouling.

The Better Players
This dataset of 441 players in the National Basketball Association is organized into 29 teams. For each player, area indicates number of points scored and color indicates number of personal fouls. Darker, redder colors indicate more personal fouls. There is clearly a wide range of scoring and personal fouling, but the large green rectangles highlight those who manage to score many points while avoiding personal fouling.
